March 2020

Dear Customer,

Please see below statement from Best Badges Ltd regarding Covid-19.

At the current time we are all experiencing uncertainty and anxiety relating to COVID-19, and the new Coronavirus that causes COVID-19. The team at Best Badges would like to provide as much reassurance to our customers as we can during this difficult time.

We have currently no reported infections within our workforce, but contingency planning is in place to enable business continuity in the expectation of the need for significant numbers of staff to self-isolate.

Already our office staff are fully working from home utilising IT systems to seamlessly continue service. Our production and warehouse staff that remain on site are being supported with increased hygiene measures and in practicing social distancing. We continue to monitor and react to the latest advice from government and health organisations.

We are still very much 'open for business' and ready to help with your orders. Our business is stable and robust, we have no debt and are financially very well positioned to meet the challenges of the next few months.

Please stay safe, and be kind.

The Best Badges Team

In response to specific queries about the safety of receiving packages, please refer to the advice of the World Health Organisation:

https://www.who.int/news-room/q-a-detail/q-a-coronaviruses

Is it safe to receive a package from any area where COVID-19 has been reported?

Yes. The likelihood of an infected person contaminating commercial goods is low and the risk of catching the virus that causes COVID-19 from a package that has been moved, travelled, and exposed to different conditions and temperature is also low.
